

Create National Park Service Distance Learning Education Programs for K-12

Project Title	Create National Park Service Distance Learning Education Programs for K-12
Project Summary	Work for the National Park Service of the Washita Battlefield National Historic Site from home. Interns will create several different 1 hour Distance Learning education programs for grades K-12.
Country	United States
Country/Region of Focus	United States

Project Description

Did you visit a National Park while you were a little kid? Many kids do not get the chance. But, through modern technology, today's students around the country can visit National Parks from their own classrooms. Through a Distance Learning program, they have conversations with Park Rangers, see museums, and visit wild places through a television screen. The Washita Battlefield National Historic Site is looking for a few interns to help design and create several 1 hour Distance Learning education programs for grades K-12. The Programs can be focused on history, culture, and natural resources related to the Washita Battlefield. The interns can work from home and communicate with Park Rangers through the same technology that will be used to broadcast the programs they help create.

Required Skills or Interests

Skill(s)
Educational design
Research
Writing

Additional Information

More than 22,000 National Park Service employees care for America's 417 national park service sites and work with communities across the nation to help preserve local history and create close-to-home recreational opportunities.
